## EDUCATION

### Full Stack Web Development Certificate

University of Sydney, Coding Bootcamp

Sydney, Australia | Feb 2024- Current

### Bachelor's Degree in Computer Engineering

Tribhuvan University

Kathmandu, Nepal | 2013- 2017

## PROJECTS

### Weather Dashboard | HTML, CSS, JavaScript, Bootstrap, OpenWeatherAPI

- This application allows you to check the current weather and 5-day forecast for any city around the world.

### Qilo | HTML, Bootstrap 5, JavaScript, Object Oriented Programming(OOP)

- This application is designed to help users track their daily calorie intake and maintain a healthy lifestyle.
- The app is built using Object-Oriented Programming (OOP) principles in JavaScript, providing a modular and organized codebase.

### Reelscape | React, Tailwind CSS, Swiper JS

- A movie guide and description website made by fetching data from the movie database public API (TMDB) and displaying them dynamically with a beautiful UI.

### React Dashboard | React, Material UI, Nivo Charts, MUI Data-Grids

- A modern react dashboard made with enterprise level packages such as MUI data grids, material UI (MUI) and Nivo charts integrated with custom theme palette and dark/light mode toggle functionality.

### Bandfacts Fullstack App | JavaScript, Tailwind CSS, Webpack, Node, MongoDB, Express js

- A simple full-stack application created using vanilla JS powered by webpack dev environment.
- REST API created using Express js and Node js along with MongoDB Atlas as the cloud database to store the data.

## WORK EXPERIENCE

### Frontend Developer | Freelance

Sydney, Australia | 2022- Current

- Developed over a dozen visually appealing responsive web pages using HTML, CSS, and JavaScript.
- Specialized in Single Page Applications (SPAs) using React, and created reusable components with Tailwind CSS, Bootstrap, Material UI, and SCSS.
- Proficient in AJAX for asynchronous data fetching and demonstrating expertise in working with RESTful APIs for efficient data retrieval and manipulation.

### Junior Web Developer | G & D Developers

Kathmandu, Nepal | Jan 2023- August 2023

- Employed Context API for state management, created reusable components and furthermore implemented advanced React concepts to build an e-commerce website.
- Learned to version control the application using Git and GitHub.
- Performed unit testing using Jest.
